ELSEVIER

Thin Solid Films 369 (2000) 438–448

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volume 369

Activation temperature
Carrier activation process in As^+ implanted relaxed $Si_{1-x}Ge_x$ alloys, 203
Adsorption
Infrared study of adsorption and thermal decomposition of Si_2H_6 on Si(100), 16
Al predeposition
Effect of Al pre-deposition layer on the epitaxial growth of silicon on Al_2O_3/Si (111) substrates, 134
Alloys
Photoluminescence characterization of erbium doped $Si_{1-y}C_y$ alloys grown by MBE, 398
As implantation
Carrier activation process in As^+ implanted relaxed $Si_{1-x}Ge_x$ alloys, 203
Atomic force microscope
New kinetic growth instabilities in Si(001) homoepitaxy, 1
The formation of silicon (111) boron surface phases and their influence on the epitaxial growth of silicon and germanium, 10
Control of self-assembling formation of nanometer silicon dots by low pressure chemical vapor deposition, 55
Positioning of self-assembling Ge islands on Si(111) mesas by using atomic steps, 88
Residual strain and surface roughness of $Si_{1-x}Ge_x$ alloy layers grown by molecular beam epitaxy on Si(001) substrate, 161
Atomic layer doping
Atomic layer doping of SiGe – fundamentals and device applications, 189

β-$FeSi_2$
Growth of β-$FeSi_2$ and FeSi layers by reactive deposition using Sb-related intermetallic compounds, 248
B_2H_6/H_2
Drastic modification of the growth mode of Ge quantum dots on Si by using boron adlayer, 84
Band alignment
Band ordering of the pseudomorphic $Si_{1-x}Ge_x$/Si heterostructure: the fundamental role of excitons, 394
Bandgap
Synthesis of SiGeC layers by ion implantation of Ge and C, 217
Band-to-band tunneling
Drain leakage current and instability of drain current in Si/$Si_{1-x}Ge_x$ MOSFETs, 379
Bipolar transistor
Comparative analysis of minority carrier transport in npn bipolar transistors with Si, $Si_{1-x}Ge_x$, and $Si_{1-y}C_y$ base layers, 347
Boron
RHEED analysis of twinned homoepitaxial layers grown on Si(111)$\sqrt{3}\times\sqrt{3}$-B, 5
A novel measurement method of segregating adlayers in MBE, 138
Segregation and diffusion of impurities from doped $Si_{1-x}Ge_x$ films into silicon, 222
Boron adlayer
Drastic modification of the growth mode of Ge quantum dots on Si by using boron adlayer, 84
Boron adsorption
A novel doping technology for ultra-shallow junction fabrication: boron diffusion from boron-adsorbed layer by rapid thermal annealing, 207
Boron diffusion
A novel doping technology for ultra-shallow junction fabrication: boron diffusion from boron-adsorbed layer by rapid thermal annealing, 207
Boron doping
Heteroepitaxial growth of SiGe films and heavy B doping by ion-beam sputtering, 171
A novel doping technology for ultra-shallow junction fabrication: boron diffusion from boron-adsorbed layer by rapid thermal annealing, 207
Boron-mediated growth
Boron-mediated growth of Ge quantum dots on Si(100) substrate, 92
Boron redistribution
Epitaxial growth of heavily B-doped SiGe films and interfacial reaction of Ti/B-doped SiGe bilayer structure using rapid thermal processing, 130
Boron surface phase
The formation of silicon (111) boron surface phases and their influence on the epitaxial growth of silicon and germanium, 10

C49-$TiSi_2$
The effect of elevated silicon substrate temperature on $TiSi_2$ formatio from a Ti film, 244
C54-$TiSi_2$
The effect of elevated silicon substrate temperature on $TiSi_2$ formatio from a Ti film, 244
C54-Ti$(SiGe)_2$
Epitaxial growth of heavily B-doped SiGe films and interfacial reaction of Ti/B-doped SiGe bilayer structure using rapid thermal processing, 130
C–V
Capacitance–voltage study of single-crystalline Si dots on ultrathin buried SiO_2 formed by nanometer-scale local oxidation, 69

PII: S0040-6090(00)00993-7

Carbon
Growth temperature dependence on the formation of carbon-induced Ge quantum dots, 96
Photoluminescence characterization of erbium doped $Si_{1-y}C_y$ alloys grown by MBE, 398
Carbon 60
Initial stage of SiC film growth on Si(111)7×7 and Si(100)2×1 surfaces using C_{60} as a precursor studied by STM and HRTEM, 265
Carbon doping of SiGe
Comparison of SiGe and SiGe:C heterojunction bipolar transistors, 342
Carrier concentration
Epitaxial growth of $Si_{1-x-y}Ge_xC_y$ film on Si(100) in a SiH_4-GeH_4-CH_3SiH_3 reaction, 167
Carrier heating
Field-enhanced Stokes shifts in strained $Si_{1-y}C_y$/Si(001) quantum wells, 402
Central-force-network model
A study on the local bonding structures of oxidized Si(111) surfaces, 277
Chemical vapor deposition
Atomic layer doping of SiGe – fundamentals and device applications, 189
Effect of Ge on the P doping in Si gas-source molecular beam epitaxy using Si_2H_6 and PH_3, 230
Si/SiGe n-type inverted modulation doping using ion implantation, 324
Doped vs. undoped $Si_{1-x-y}Ge_xC_y$ layers in sub-100 nm vertical p-channel MOSFETs, 366
A self-aligned epitaxially grown channel MOSFET device architecture for strained Si/SiGe systems, 375
Coaxial impact-collision ion scattering spectrometer
Effect of Al pre-deposition layer on the epitaxial growth of silicon on Al_2O_3/Si (111) substrates, 134
Cobalt
Growth of epitaxial $CoSi_2$ for contacts of ultra-thin SOI MOSFETs, 240
Computer simulations
Dynamics of surface phase separation on patterned substrates by molecular beam epitaxy, 21
Contacts
Growth of epitaxial $CoSi_2$ for contacts of ultra-thin SOI MOSFETs, 240
Controlled arrangement
Control of the arrangement of self-organized Ge dots on patterned Si(001) substrates, 49
$CoSi_2$
Epitaxial silicide interfaces in microelectronics, 233
CoTi alloy
Epitaxial silicide interfaces in microelectronics, 233
Coulomb charging effect
Coulomb charging effect of holes in Ge quantum dots studied by deep level transient spectroscopy, 65
Crystal growth
Formation of the wetting layer in Ge/Si(111) studied by STM and XAFS, 29
Crystallinity
Ge-induced enhancement of solid-phase crystallization of Si on SiO_2, 195
Crystallization
Low-temperature growth of in situ phosphorus-doped silicon films: two-step growth utilizing amorphous silicon buffers, 185

Deep level transient spectroscopy
Coulomb charging effect of holes in Ge quantum dots studied by deep level transient spectroscopy, 65
Delta doping
Enhancement of thermal diffusion of delta-doped Sb in SiGe, 226
Density of states
ESR investigations of modulation-doped Si/SiGe quantum wells, 312
Deposition
Analysis of single Si atoms deposited on the Si(111)7×7 surface, 73
Desorb
Thermal decomposition pathway of Ge and Si oxides: observation of a distinct difference, 289
Device yield
Comparison of SiGe and SiGe:C heterojunction bipolar transistors, 342
Differential molecular beam epitaxy
Relaxed $Si_{0.7}Ge_{0.3}$ buffer layers grown on patterned silicon substrates for SiGe n-channel HMOSFETs, 175
Diffusion
Surface segregation and interdiffusion of Ge on Si(001) studied by medium-energy ion scattering, 112
Formation of relaxed SiGe films on Si by selective epitaxial growth, 126
Segregation and diffusion of impurities from doped $Si_{1-x}Ge_x$ films into silicon, 222
Enhancement of thermal diffusion of delta-doped Sb in SiGe, 226
Doped vs. undoped $Si_{1-x-y}Ge_xC_y$ layers in sub-100 nm vertical p-channel MOSFETs, 366
Disilane
Infrared study of adsorption and thermal decomposition of Si_2H_6 on Si(100), 16
Dislocations
Relaxed SiGe buffers with thicknesses below 0.1 μm, 152
Dissociative adsorption
Atomic layer doping of SiGe – fundamentals and device applications, 189
Doping
Effect of Ge on the P doping in Si gas-source molecular beam epitaxy using Si_2H_6 and PH_3, 230
Dot array
Control of the arrangement of self-organized Ge dots on patterned Si(001) substrates, 49
Drain current instability
Drain leakage current and instability of drain current in Si/$Si_{1-x}Ge_x$ MOSFETs, 379
Drain leakage current
Drain leakage current and instability of drain current in Si/$Si_{1-x}Ge_x$ MOSFETs, 379

Elastic recoil detection
The formation of silicon (111) boron surface phases and their

influence on the epitaxial growth of silicon and germanium, 10
Elastic recoil detection analysis
Ge thin film growth on Si(111) surface using hydrogen surfactant, 25
Electrical properties
Si/SiGe/Si pMOS Performance - alloy scattering and other considerations, 297
Electroluminescence
Light emitting SiGe/i-Si/Si:Er:O tunneling diodes prepared by molecular beam epitaxy, 414
Electron
Transport properties of two-dimensional electron gas in a strained-Si/SiGe heterostructure at low carrier densities, 328
Electron diffraction
RHEED analysis of twinned homoepitaxial layers grown on Si(111)$\sqrt{3}\times\sqrt{3}$-B, 5
Electron spin resonance
ESR investigations of modulation-doped Si/SiGe quantum wells, 312
Electronic coupling
Strain-driven modification of the Ge/Si growth mode in stacked layers: a way to produce Ge islands having equal size in all layers, 43
Ellipsometry
In situ characterization of thin $Si_{1-x}Ge_x$ films on Si(100) by spectroscopic ellipsometry, 157
Emitter-coupled logic
Self-aligned selective-epitaxial-growth SiGe HBTs: process, device, and Ics, 352
Epitaxial film
Growth of Mn doped epitaxial β-$FeSi_2$ films on Si(001) substrates by reactive deposition epitaxy, 253
Epitaxial silicide
Epitaxial silicide interfaces in microelectronics, 233
Epitaxy
RHEED analysis of twinned homoepitaxial layers grown on Si(111)$\sqrt{3}\times\sqrt{3}$-B, 5
Relaxed SiGe buffers with thicknesses below 0.1 μm, 152
Low-temperature growth of in situ phosphorus-doped silicon films: two-step growth utilizing amorphous silicon buffers, 185
Atomic layer doping of SiGe – fundamentals and device applications, 189
Effect of Ge on the P doping in Si gas-source molecular beam epitaxy using Si_2H_6 and PH_3, 230
Growth of epitaxial $CoSi_2$ for contacts of ultra-thin SOI MOSFETs, 240
Growth of β-$FeSi_2$ and FeSi layers by reactive deposition using Sb-related intermetallic compounds, 248
Heteroepitaxial growth of SrO on hydrogen-terminated Si(100) surface, 273
Erbium
Photoluminescence characterization of erbium doped $Si_{1-y}C_y$ alloys grown by MBE, 398
Light emitting SiGe/i-Si/Si:Er:O tunneling diodes prepared by molecular beam epitaxy, 414
Properties of optically active Si:Er and $Si_{1-x}Ge_x$ layers grown by the sublimation MBE method, 426
Esaki diodes
Self-assembling SiGe and SiGeC nanostructures for light emitters and tunneling diodes, 33
A vertical MOS-gated Esaki tunneling transistor in silicon, 387
Excitons
Band ordering of the pseudomorphic $Si_{1-x}Ge_x$/Si heterostructure: the fundamental role of excitons, 394
Exciton binding energy
Band ordering of the pseudomorphic $Si_{1-x}Ge_x$/Si heterostructure: the fundamental role of excitons, 394

Field effect devices
Si/SiGe/Si pMOS Performance - alloy scattering and other considerations, 297
Field-enhanced Stokes shift
Field-enhanced Stokes shifts in strained $Si_{1-y}C_y$/Si(001) quantum wells, 402
First principles calculation
Synthesis of SiGeC layers by ion implantation of Ge and C, 217

Gas source molecular beam epitaxy
Formation process and ordering of self-assembled Ge islands, 104
Gas-source MBE of SiC/Si using monomethylsilane, 269
Germanium
Ge thin film growth on Si(111) surface using hydrogen surfactant, 25
RHEED studies of nucleation of Ge islands on Si(001) and optical properties of ultra-small Ge quantum dots, 79
Positioning of self-assembling Ge islands on Si(111) mesas by using atomic steps, 88
Optical investigation of modified Stranski–Krastanov growth mode in the stacking of self-assembled Ge islands, 108
In situ characterization of thin $Si_{1-x}Ge_x$ films on Si(100) by spectroscopic ellipsometry, 157
A novel structure in Ge/Si epilayers grown at low temperature, 182
Factors limiting the composition window for fabrication of SiGe-on-insulator substrate by low-energy oxygen implantation, 213
Segregation and diffusion of impurities from doped $Si_{1-x}Ge_x$ films into silicon, 222
Transport properties of two-dimensional electron gas in a strained-Si/SiGe heterostructure at low carrier densities, 328
Ge dots
Drastic modification of the growth mode of Ge quantum dots on Si by using boron adlayer, 84
Ge islands
Formation process and ordering of self-assembled Ge islands, 104
Ge nanocrystal
Formation of size controlled Ge nanocrystals in SiO_2 matrix by ion implantation and annealing, 100
Ge oxide
Thermal decomposition pathway of Ge and Si oxides: observation of a distinct difference, 289
Ge quantum dot
Growth temperature dependence on the formation of carbon-induced Ge quantum dots, 96

Geometric magnetoresistance
Hot carrier transport in modulation doped Si/SiGe and Ge/SiGe heterostructures, 333

Ginzburg–Landau model
Dynamics of surface phase separation on patterned substrates by molecular beam epitaxy, 21
Graded-channel
Strained $Si_{1-x}Ge_x$ graded channel PMOSFET grown by UHVCVD, 371
Groove islands
A novel structure in Ge/Si epilayers grown at low temperature, 182
Growth instability
New kinetic growth instabilities in Si(001) homoepitaxy, 1
Growth mechanism
Optical investigation of modified Stranski–Krastanov growth mode in the stacking of self-assembled Ge islands, 108
Initial stage of SiC film growth on Si(111)7×7 and Si(100)2×1 surfaces using C_{60} as a precursor studied by STM and HRTEM, 265

Hall factor
Experimental evidence of valence band deformation due to strain in inverted hole channel of strained-Si pMOSFETs, 338
Heavy B doping
Epitaxial growth of heavily B-doped SiGe films and interfacial reaction of Ti/B-doped SiGe bilayer structure using rapid thermal processing, 130
Heteroepitaxial Al_2O_3
Effect of Al pre-deposition layer on the epitaxial growth of silicon on Al_2O_3/Si (111) substrates, 134
Heteroepitaxial growth
SiC/Si heteroepitaxial growth, 257
Heteroepitaxy
Gas-source MBE of SiC/Si using monomethylsilane, 269
Heterojunction bipolar transistor
Comparative analysis of minority carrier transport in npn bipolar transistors with Si, $Si_{1-x}Ge_x$, and $Si_{1-y}C_y$ base layers, 347
Self-aligned selective-epitaxial-growth SiGe HBTs: process, device, and Ics, 352
$Si_{1-x}Ge_x$ selective epitaxial growth for ultra-high-speed self-aligned HBTs, 358
Heterojunction devices
Atomic layer doping of SiGe – fundamentals and device applications, 189
Hetero-MOSFETs
Relaxed $Si_{0.7}Ge_{0.3}$ buffer layers grown on patterned silicon substrates for SiGe n-channel HMOSFETs, 175
High-speed transport in $Si/Si_{1-x-y}Ge_xC_y$ heterostructures, 306
Heterostructure
Limited number of carriers transferred to the strained-Si channel in the SiGe/Si/SiGe modulation-doped field-effect transistor, 362
Transport properties of two-dimensional electron gas in a strained-Si/SiGe heterostructure at low carrier densities, 328
Heterostructure metal oxide semiconductor field-effect transistor
Strained $Si_{1-x}Ge_x$ graded channel PMOSFET grown by UHVCVD, 371
High temperature sputtering
Epitaxial silicide interfaces in microelectronics, 233
High-resolution electron energy loss spectroscopy
A study on the local bonding structures of oxidized Si(111) surfaces, 277
Hot carrier transport
Hot carrier transport in modulation doped Si/SiGe and Ge/SiGe heterostructures, 333
Hot electron
Light emitting SiGe/i-Si/Si:Er:O tunneling diodes prepared by molecular beam epitaxy, 414
H-terminated Si surface
A study on the local bonding structures of oxidized Si(111) surfaces, 277
Hut-clusters
Formation process and ordering of self-assembled Ge islands, 104
Hydrogen
Ge thin film growth on Si(111) surface using hydrogen surfactant, 25
Hydrogen-terminated silicon
Heteroepitaxial growth of SrO on hydrogen-terminated Si(100) surface, 273

Implantation
Epitaxial growth of $Si_{1-x-y}Ge_xC_y$ film on Si(100) in a SiH_4-GeH_4-CH_3SiH_3 reaction, 167
Infrared absorption
Infrared study of adsorption and thermal decomposition of Si_2H_6 on Si(100), 16
Inhomogeneous potential
Field-enhanced Stokes shifts in strained $Si_{1-y}C_y$/Si(001) quantum wells, 402
Integrated circuits
Self-aligned selective-epitaxial-growth SiGe HBTs: process, device, and Ics, 352
Interdiffusion
Growth of β-$FeSi_2$ and FeSi layers by reactive deposition using Sb-related intermetallic compounds, 248
Interface mixing
Growth and characterization of $^{70}Ge_n/^{74}Ge_n$ isotope superlattices, 405
Interface roughness
Low temperature buffer growth for modulation doped SiGe/Ge/SiGe heterostructures with high hole mobility, 320
Interface states
Capacitance–voltage study of single-crystalline Si dots on ultrathin buried SiO_2 formed by nanometer-scale local oxidation, 69
Intermixing
Formation of the wetting layer in Ge/Si(111) studied by STM and XAFS, 29
Inverted
Si/SiGe n-type inverted modulation doping using ion implantation, 324
Ion implantation
Formation of size controlled Ge nanocrystals in SiO_2 matrix by ion implantation and annealing, 100
Synthesis of SiGeC layers by ion implantation of Ge and C, 217

Si/SiGe n-type inverted modulation doping using ion implantation, 324
Ion scattering
Surface segregation and interdiffusion of Ge on Si(001) studied by medium-energy ion scattering, 112
Ion scattering spectroscopy
Ge thin film growth on Si(111) surface using hydrogen surfactant, 25
Ion-beam sputtering
Heteroepitaxial growth of SiGe films and heavy B doping by ion-beam sputtering, 171
Iron disilicide
Growth of Mn doped epitaxial β-$FeSi_2$ films on Si(001) substrates by reactive deposition epitaxy, 253
Islands
Step bunching and correlated SiGe nanostructures on Si(113), 39
A novel structure in Ge/Si epilayers grown at low temperature, 182
Isotope superlattices
Growth and characterization of $^{70}Ge_n/^{74}Ge_n$ isotope superlattices, 405

Lattice location of constituent atoms
Characterization of SiGeC thin films by MeV ion scattering and X-ray diffraction, 143
Lattice strain
Formation of the wetting layer in Ge/Si(111) studied by STM and XAFS, 29
Light emitting diode
Light emitting SiGe/i-Si/Si:Er:O tunneling diodes prepared by molecular beam epitaxy, 414
Linear-chain model
Growth and characterization of $^{70}Ge_n/^{74}Ge_n$ isotope superlattices, 405
LO phonons
Growth and characterization of $^{70}Ge_n/^{74}Ge_n$ isotope superlattices, 405
Local bonding structure of Si–O–Si species
A study on the local bonding structures of oxidized Si(111) surfaces, 277
Localization
Optical and structural characterization of Si/SiGe heterostructures grown by RTCVD, 431
Low temperature growth
Relaxed SiGe buffers with thicknesses below 0.1 μm, 152
Low-energy plasma-enhanced chemical vapor deposition
Alternatives to thick MBE-grown relaxed SiGe buffers, 148
Low-pressure chemical vapor deposition
Control of self-assembling formation of nanometer silicon dots by low pressure chemical vapor deposition, 55
Low-temperature buffer
Low temperature buffer growth for modulation doped SiGe/Ge/SiGe heterostructures with high hole mobility, 320
Luminescence
Properties of optically active Si:Er and $Si_{1-x}Ge_x$ layers grown by the sublimation MBE method, 426

Metal-oxide semiconductor structure
Strain near SiO_2–Si interface revealed by X-ray diffraction intensity enhancement, 281
Optimization of breakdown behaviour and short channel effects in MBE-grown vertical MOS-devices with local channel doping, 383
Metal-oxide-semiconductor field effect transistor
Experimental evidence of valence band deformation due to strain in inverted hole channel of strained-Si pMOSFETs, 338
A self-aligned epitaxially grown channel MOSFET device architecture for strained Si/SiGe systems, 375
Drain leakage current and instability of drain current in Si/$Si_{1-x}Ge_x$ MOSFETs, 379
Methylsilane
Epitaxial growth of $Si_{1-x-y}Ge_xC_y$ film on Si(100) in a SiH_4-GeH_4-CH_3SiH_3 reaction, 167
MeV ion beam scattering
Characterization of SiGeC thin films by MeV ion scattering and X-ray diffraction, 143
Micro-Raman spectroscopy
Relaxed $Si_{0.7}Ge_{0.3}$ buffer layers grown on patterned silicon substrates for SiGe n-channel HMOSFETs, 175
Migration
Nucleation and growth of Ge on Si(111) in solid phase epitaxy, 116
Minority carrier mobility
Comparative analysis of minority carrier transport in npn bipolar transistors with Si, $Si_{1-x}Ge_x$, and $Si_{1-y}C_y$ base layers, 347
Misfit stress relaxation
Relaxed SiGe buffers with thicknesses below 0.1 μm, 152
Mn doping
Growth of Mn doped epitaxial β-$FeSi_2$ films on Si(001) substrates by reactive deposition epitaxy, 253
Mobility
Alternatives to thick MBE-grown relaxed SiGe buffers, 148
High-speed transport in $Si/Si_{1-x-y}Ge_xC_y$ heterostructures, 306
Transport properties of two-dimensional electron gas in a strained-Si/SiGe heterostructure at low carrier densities, 328
Modulation doped field effect transistor
Alternatives to thick MBE-grown relaxed SiGe buffers, 148
Modulation doped structure
Low temperature buffer growth for modulation doped SiGe/Ge/SiGe heterostructures with high hole mobility, 320
Modulation doping
ESR investigations of modulation-doped Si/SiGe quantum wells, 312
High-speed transport in $Si/Si_{1-x-y}Ge_xC_y$ heterostructures, 306
Modulation-doped field effect transistor
Schottky gating high mobility $Si/Si_{1-x}Ge_x$ 2D electron systems, 316
Limited number of carriers transferred to the strained-Si channel in the SiGe/Si/SiGe modulation-doped field-effect transistor, 362
Molar beam epitaxy
New kinetic growth instabilities in Si(001) homoepitaxy, 1
Dynamics of surface phase separation on patterned substrates by molecular beam epitaxy, 21
Nanostructures in silicon devices, 60

Positioning of self-assembling Ge islands on Si(111) mesas by using atomic steps, 88
Boron-mediated growth of Ge quantum dots on Si(100) substrate, 92
Growth temperature dependence on the formation of carbon-induced Ge quantum dots, 96
Alternatives to thick MBE-grown relaxed SiGe buffers, 148
Residual strain and surface roughness of $Si_{1-x}Ge_x$ alloy layers grown by molecular beam epitaxy on Si(001) substrate, 161
SiC/Si heteroepitaxial growth, 257
Limited number of carriers transferred to the strained-Si channel in the SiGe/Si/SiGe modulation-doped field-effect transistor, 362
Optimization of breakdown behaviour and short channel effects in MBE-grown vertical MOS-devices with local channel doping, 383
A vertical MOS-gated Esaki tunneling transistor in silicon, 387
Investigation of the emitter structure in SiGe/Si resonant tunneling structures, 390
Photoluminescence characterization of erbium doped $Si_{1-y}C_y$ alloys grown by MBE, 398
Growth and characterization of $^{70}Ge_n/^{74}Ge_n$ isotope superlattices, 405
Structural and optical properties of $Si/Si_{1-x}Ge_x$ wires, 409
Light emitting SiGe/i-Si/Si:Er:O tunneling diodes prepared by molecular beam epitaxy, 414
Y-branch 1.3/1.55 μm wavelength demultiplexer based on the plasma dispersion effect, 419

Molecular dynamics simulation
SiC/Si heteroepitaxial growth, 257

Molecular orbital
Non-equilibrium molecular orbital calculations of Si/SiO_2 interfaces, 285

Monomethylsilane
Gas-source MBE of SiC/Si using monomethylsilane, 269

Monte-Carlo
Non-equilibrium molecular orbital calculations of Si/SiO_2 interfaces, 285

Nanometer-scale local oxidation
Capacitance–voltage study of single-crystalline Si dots on ultrathin buried SiO_2 formed by nanometer-scale local oxidation, 69

Nanostructures
Nanostructures in silicon devices, 60

Nitridation of Si(100)
Scanning tunneling microscopy/scanning tunneling spectroscopy of initial nitridation process of Si(100)-2×1 surfaces, 293

Non-equilibrium
Non-equilibrium molecular orbital calculations of Si/SiO_2 interfaces, 285

Non-Rutherford resonant elastic scattering
Characterization of SiGeC thin films by MeV ion scattering and X-ray diffraction, 143

Nucleation
Control of self-assembling formation of nanometer silicon dots by low pressure chemical vapor deposition, 55
Ge-induced enhancement of solid-phase crystallization of Si on SiO_2, 195

Nucleation center
Drastic modification of the growth mode of Ge quantum dots on Si by using boron adlayer, 84

Optical properties
Anomalous surface absorption band at 1.2 eV in $Si_{1-x}Ge_x$ alloy-based structures, 423

Optical spectroscopy
Optical investigation of modified Stranski–Krastanov growth mode in the stacking of self-assembled Ge islands, 108

Optical waveguide
Y-branch 1.3/1.55 μm wavelength demultiplexer based on the plasma dispersion effect, 419

Optical-fiber-link
Self-aligned selective-epitaxial-growth SiGe HBTs: process, device, and Ics, 352

Ordering
Step bunching and correlated SiGe nanostructures on Si(113), 39

Oxidation
Anomalous surface absorption band at 1.2 eV in $Si_{1-x}Ge_x$ alloy-based structures, 423

Oxide mediated epitaxy
Epitaxial silicide interfaces in microelectronics, 233

Patterned substrate
Dynamics of surface phase separation on patterned substrates by molecular beam epitaxy, 21

Percolation
Formation of the wetting layer in Ge/Si(111) studied by STM and XAFS, 29

Phase transition
The effect of elevated silicon substrate temperature on $TiSi_2$ formatio from a Ti film, 244

Phonon confinement
Hot carrier transport in modulation doped Si/SiGe and Ge/SiGe heterostructures, 333

Phosphorus
Epitaxial growth of $Si_{1-x-y}Ge_xC_y$ film on Si(100) in a SiH_4-GeH_4-CH_3SiH_3 reaction, 167
Low-temperature growth of in situ phosphorus-doped silicon films: two-step growth utilizing amorphous silicon buffers, 185
Segregation and diffusion of impurities from doped $Si_{1-x}Ge_x$ films into silicon, 222
Effect of Ge on the P doping in Si gas-source molecular beam epitaxy using Si_2H_6 and PH_3, 230

Photoluminescence
Self-assembling SiGe and SiGeC nanostructures for light emitters and tunneling diodes, 33
Photoluminescence characterization of erbium doped $Si_{1-y}C_y$ alloys grown by MBE, 398
Structural and optical properties of $Si/Si_{1-x}Ge_x$ wires, 409
Optical and structural characterization of Si/SiGe heterostructures grown by RTCVD, 431

PIN-diodes
Nanostructures in silicon devices, 60

Plasma dispersion effect
Y-branch 1.3/1.55 μm wavelength demultiplexer based on the plasma dispersion effect, 419

Point defects
Relaxed SiGe buffers with thicknesses below 0.1 μm, 152
Polycrystalline
Low-temperature growth of in situ phosphorus-doped silicon films: two-step growth utilizing amorphous silicon buffers, 185
Pyramid-shaped islands
Formation process and ordering of self-assembled Ge islands, 104

Quantum dots
The formation of silicon (111) boron surface phases and their influence on the epitaxial growth of silicon and germanium, 10
Self-assembling SiGe and SiGeC nanostructures for light emitters and tunneling diodes, 33
Strain-driven modification of the Ge/Si growth mode in stacked layers: a way to produce Ge islands having equal size in all layers, 43
Coulomb charging effect of holes in Ge quantum dots studied by deep level transient spectroscopy, 65
RHEED studies of nucleation of Ge islands on Si(001) and optical properties of ultra-small Ge quantum dots, 79
Boron-mediated growth of Ge quantum dots on Si(100) substrate, 92

Radical nitrogen
Scanning tunneling microscopy/scanning tunneling spectroscopy of initial nitridation process of Si(100)-2×1 surfaces, 293
Raman scattering
Growth and characterization of $^{70}Ge_n/^{74}Ge_n$ isotope superlattices, 405
Random alloy
Formation of the wetting layer in Ge/Si(111) studied by STM and XAFS, 29
Rapid thermal annealing
A novel doping technology for ultra-shallow junction fabrication: boron diffusion from boron-adsorbed layer by rapid thermal annealing, 207
Rapid thermal chemical vapor deposition
Epitaxial growth of heavily B-doped SiGe films and interfacial reaction of Ti/B-doped SiGe bilayer structure using rapid thermal processing, 130
Rapid thermal oxidation
Strained $Si_{1-x}Ge_x$ graded channel PMOSFET grown by UHVCVD, 371
Reactive deposition epitaxy
Growth of Mn doped epitaxial β-$FeSi_2$ films on Si(001) substrates by reactive deposition epitaxy, 253
Reduced pressure chemical vapor deposition
Low-temperature growth of in situ phosphorus-doped silicon films: two-step growth utilizing amorphous silicon buffers, 185
Relaxed SiGe buffer layers
Relaxed $Si_{0.7}Ge_{0.3}$ buffer layers grown on patterned silicon substrates for SiGe n-channel HMOSFETs, 175
Relaxed SiGe films
Formation of relaxed SiGe films on Si by selective epitaxial growth, 126
Residual strain
Residual strain and surface roughness of $Si_{1-x}Ge_x$ alloy layers grown by molecular beam epitaxy on Si(001) substrate, 161
Resistivity
Epitaxial growth of $Si_{1-x-y}Ge_xC_y$ film on Si(100) in a SiH_4-GeH_4-CH_3SiH_3 reaction, 167
Growth of epitaxial $CoSi_2$ for contacts of ultra-thin SOI MOSFETs, 240
Resonant tunneling devices
Investigation of the emitter structure in SiGe/Si resonant tunneling structures, 390
RF performance
Comparison of SiGe and SiGe:C heterojunction bipolar transistors, 342
Ridges
Control of the arrangement of self-organized Ge dots on patterned Si(001) substrates, 49
Ripening
Nucleation and growth of Ge on Si(111) in solid phase epitaxy, 116

Sb
Enhancement of thermal diffusion of delta-doped Sb in SiGe, 226
Growth of β-$FeSi_2$ and FeSi layers by reactive deposition using Sb-related intermetallic compounds, 248
Sb surfactant
Experimental study of a surfactant-assisted SiGe graded layer and a symmetrically strained Si/Ge superlattice for thermoelectric applications, 121
Scanning tunneling microscopy
The formation of silicon (111) boron surface phases and their influence on the epitaxial growth of silicon and germanium, 10
Analysis of single Si atoms deposited on the Si(111)7×7 surface, 73
Nucleation and growth of Ge on Si(111) in solid phase epitaxy, 116
Initial stage of SiC film growth on Si(111)7×7 and Si(100)2×1 surfaces using C_{60} as a precursor studied by STM and HRTEM, 265
Scanning tunneling microscopy/scanning tunneling spectroscopy of initial nitridation process of Si(100)-2×1 surfaces, 293
Scattering
Transport properties of two-dimensional electron gas in a strained-Si/SiGe heterostructure at low carrier densities, 328
Schottky gating
Schottky gating high mobility $Si/Si_{1-x}Ge_x$ 2D electron systems, 316
Screening
Transport properties of two-dimensional electron gas in a strained-Si/SiGe heterostructure at low carrier densities, 328
Segregation
Segregation and diffusion of impurities from doped $Si_{1-x}Ge_x$ films into silicon, 222
Enhancement of thermal diffusion of delta-doped Sb in SiGe, 226

Selective epitaxial growth
Formation of relaxed SiGe films on Si by selective epitaxial growth, 126
Self-aligned selective-epitaxial-growth SiGe HBTs: process, device, and Ics, 352
$Si_{1-x}Ge_x$ selective epitaxial growth for ultra-high-speed self-aligned HBTs, 358
Selective growth
Control of self-assembling formation of nanometer silicon dots by low pressure chemical vapor deposition, 55
Self organization
Step bunching and correlated SiGe nanostructures on Si(113), 39
Self-aligned epitaxy
A self-aligned epitaxially grown channel MOSFET device architecture for strained Si/SiGe systems, 375
Self-aligned structure
$Si_{1-x}Ge_x$ selective epitaxial growth for ultra-high-speed self-aligned HBTs, 358
Self-assembled growth
The formation of silicon (111) boron surface phases and their influence on the epitaxial growth of silicon and germanium, 10
Positioning of self-assembling Ge islands on Si(111) mesas by using atomic steps, 88
Self-assembling
Control of self-assembling formation of nanometer silicon dots by low pressure chemical vapor deposition, 55
Self-assembly
Self-assembling SiGe and SiGeC nanostructures for light emitters and tunneling diodes, 33
Nanostructures in silicon devices, 60
Self-organization
RHEED studies of nucleation of Ge islands on Si(001) and optical properties of ultra-small Ge quantum dots, 79
Self-organized dots
Control of the arrangement of self-organized Ge dots on patterned Si(001) substrates, 49
Semiconductor nanostructures
The formation of silicon (111) boron surface phases and their influence on the epitaxial growth of silicon and germanium, 10
Semiconductor-on-insulator
Factors limiting the composition window for fabrication of SiGe-on-insulator substrate by low-energy oxygen implantation, 213
Semi-empirical molecular orbital calculation
Analysis of single Si atoms deposited on the Si(111)7×7 surface, 73
Separation by implanted oxygen
Factors limiting the composition window for fabrication of SiGe-on-insulator substrate by low-energy oxygen implantation, 213
Formation of strained-silicon layer on thin relaxed-SiGe/SiO_2/Si structure using SIMOX technology, 199
Si
Positioning of self-assembling Ge islands on Si(111) mesas by using atomic steps, 88
Low-temperature growth of in situ phosphorus-doped silicon films: two-step growth utilizing amorphous silicon buffers, 185
Effect of Ge on the P doping in Si gas-source molecular beam epitaxy using Si_2H_6 and PH_3, 230
Si(100)
Gas-source MBE of SiC/Si using monomethylsilane, 269
Si(111)
The effect of elevated silicon substrate temperature on $TiSi_2$ formatio from a Ti film, 244
Si(111)7×7 surface
Analysis of single Si atoms deposited on the Si(111)7×7 surface, 73
Si(113)
Step bunching and correlated SiGe nanostructures on Si(113), 39
$Si_{1-x}Ge_x$ alloy layers
Residual strain and surface roughness of $Si_{1-x}Ge_x$ alloy layers grown by molecular beam epitaxy on Si(001) substrate, 161
$Si_{1-x}Ge_x$
$Si_{1-x}Ge_x$ selective epitaxial growth for ultra-high-speed self-aligned HBTs, 358
Band ordering of the pseudomorphic $Si_{1-x}Ge_x$/Si heterostructure: the fundamental role of excitons, 394
$Si_{1-x}Ge_x$ relaxed alloys
Carrier activation process in As^+ implanted relaxed $Si_{1-x}Ge_x$ alloys, 203
$Si_{1-x-y}Ge_xC_y$
Epitaxial growth of $Si_{1-x-y}Ge_xC_y$ film on Si(100) in a SiH_4-GeH_4-CH_3SiH_3 reaction, 167
Silicon
New kinetic growth instabilities in Si(001) homoepitaxy, 1
RHEED analysis of twinned homoepitaxial layers grown on Si(111)$\sqrt{3}\times\sqrt{3}$-BQ, 5
Ge thin film growth on Si(111) surface using hydrogen surfactant, 25
RHEED studies of nucleation of Ge islands on Si(001) and optical properties of ultra-small Ge quantum dots, 79
Optical investigation of modified Stranski–Krastanov growth mode in the stacking of self-assembled Ge islands, 108
In situ characterization of thin $Si_{1-x}Ge_x$ films on Si(100) by spectroscopic ellipsometry, 157
A novel structure in Ge/Si epilayers grown at low temperature, 182
Factors limiting the composition window for fabrication of SiGe-on-insulator substrate by low-energy oxygen implantation, 213
Segregation and diffusion of impurities from doped $Si_{1-x}Ge_x$ films into silicon, 222
Transport properties of two-dimensional electron gas in a strained-Si/SiGe heterostructure at low carrier densities, 328
Photoluminescence characterization of erbium doped $Si_{1-y}C_y$ alloys grown by MBE, 398
Light emitting SiGe/i-Si/Si:Er:O tunneling diodes prepared by molecular beam epitaxy, 414
Properties of optically active Si:Er and $Si_{1-x}Ge_x$ layers grown by the sublimation MBE method, 426
Silicon based nanostructures
Structural and optical properties of Si/$Si_{1-x}Ge_x$ wires, 409
Silicon carbide
Initial stage of SiC film growth on Si(111)7×7 and Si(100)2×1 surfaces using C_{60} as a precursor studied by STM and HRTEM, 265

Gas-source MBE of SiC/Si using monomethylsilane, 269
SiC/Si heteroepitaxial growth, 257
Silicon germanium
Step bunching and correlated SiGe nanostructures on Si(113), 39
Epitaxial growth of heavily B-doped SiGe films and interfacial reaction of Ti/B-doped SiGe bilayer structure using rapid thermal processing, 130
Relaxed SiGe buffers with thicknesses below 0.1 μm, 152
Heteroepitaxial growth of SiGe films and heavy B doping by ion-beam sputtering, 171
Atomic layer doping of SiGe – fundamentals and device applications, 189
Ge-induced enhancement of solid-phase crystallization of Si on SiO_2, 195
Formation of strained-silicon layer on thin relaxed-SiGe/SiO_2/Si structure using SIMOX technology, 199
Enhancement of thermal diffusion of delta-doped Sb in SiGe, 226
Si/SiGe/Si pMOS Performance - alloy scattering and other considerations, 297
High-speed transport in $Si/Si_{1-x-y}Ge_xC_y$ heterostructures, 306
ESR investigations of modulation-doped Si/SiGe quantum wells, 312
Schottky gating high mobility $Si/Si_{1-x}Ge_x$ 2D electron systems, 316
Experimental evidence of valence band deformation due to strain in inverted hole channel of strained-Si pMOSFETs, 338
Self-aligned selective-epitaxial-growth SiGe HBTs: process, device, and ICs, 352
Limited number of carriers transferred to the strained-Si channel in the SiGe/Si/SiGe modulation-doped field-effect transistor, 362
A self-aligned epitaxially grown channel MOSFET device architecture for strained Si/SiGe systems, 375
Drain leakage current and instability of drain current in $Si/Si_{1-x}Ge_x$ MOSFETs, 379
Investigation of the emitter structure in SiGe/Si resonant tunneling structures, 390
Anomalous surface absorption band at 1.2 eV in $Si_{1-x}Ge_x$ alloy-based structures, 423
SiGe graded layers
Experimental study of a surfactant-assisted SiGe graded layer and a symmetrically strained Si/Ge superlattice for thermoelectric applications, 121
SiGe heterojunction bipolar transistors
Comparison of SiGe and SiGe:C heterojunction bipolar transistors, 342
Si/SiGe
Optical and structural characterization of Si/SiGe heterostructures grown by RTCVD, 431
SiGeC
Synthesis of SiGeC layers by ion implantation of Ge and C, 217
SiGeC alloys
Self-assembling SiGe and SiGeC nanostructures for light emitters and tunneling diodes, 33
SiGeC compound semiconductor film
Characterization of SiGeC thin films by MeV ion scattering and X-ray diffraction, 143
Si mesas
Control of the arrangement of self-organized Ge dots on patterned Si(001) substrates, 49
Si oxide
Thermal decomposition pathway of Ge and Si oxides: observation of a distinct difference, 289
Si surface
Infrared study of adsorption and thermal decomposition of Si_2H_6 on Si(100), 16
Silicides
Growth of epitaxial $CoSi_2$ for contacts of ultra-thin SOI MOSFETs, 240
Silicon dots
Control of self-assembling formation of nanometer silicon dots by low pressure chemical vapor deposition, 55
Silicon molecular beam epitaxy
Effect of Al pre-deposition layer on the epitaxial growth of silicon on Al_2O_3/Si (111) substrates, 134
A novel measurement method of segregating adlayers in MBE, 138
Silicon on isulator
Capacitance–voltage study of single-crystalline Si dots on ultrathin buried SiO_2 formed by nanometer-scale local oxidation, 69
Effect of Al pre-deposition layer on the epitaxial growth of silicon on Al_2O_3/Si (111) substrates, 134
Formation of strained-silicon layer on thin relaxed-SiGe/SiO_2/Si structure using SIMOX technology, 199
Si/SiGe n-type inverted modulation doping using ion implantation, 324
Y-branch 1.3/1.55 μm wavelength demultiplexer based on the plasma dispersion effect, 419
Single Si atom
Analysis of single Si atoms deposited on the Si(111)7×7 surface, 73
Single-crystalline Si dot
Capacitance–voltage study of single-crystalline Si dots on ultrathin buried SiO_2 formed by nanometer-scale local oxidation, 69
SiO_2
A study on the local bonding structures of oxidized Si(111) surfaces, 277
Small dots
Drastic modification of the growth mode of Ge quantum dots on Si by using boron adlayer, 84
Solid phase crystallization
Ge-induced enhancement of solid-phase crystallization of Si on SiO_2, 195
Solid phase epitaxy
Nucleation and growth of Ge on Si(111) in solid phase epitaxy, 116
Enhancement of thermal diffusion of delta-doped Sb in SiGe, 226
Solubility limit
Carrier activation process in As^+ implanted relaxed $Si_{1-x}Ge_x$ alloys, 203
Stacked layers
Strain-driven modification of the Ge/Si growth mode in stacked layers: a way to produce Ge islands having equal size in all layers, 43

Step arrangement control
Positioning of self-assembling Ge islands on Si(111) mesas by using atomic steps, 88
Strain
Formation of relaxed SiGe films on Si by selective epitaxial growth, 126
Epitaxial growth of heavily B-doped SiGe films and interfacial reaction of Ti/B-doped SiGe bilayer structure using rapid thermal processing, 130
Strain near SiO_2–Si interface revealed by X-ray diffraction intensity enhancement, 281
Strained $Si_{1-x}Ge_x$ graded channel PMOSFET grown by UHVCVD, 371
Strain-adjustment
High-speed transport in Si/$Si_{1-x-y}Ge_xC_y$ heterostructures, 306
Strain relaxation
Characterization of SiGeC thin films by MeV ion scattering and X-ray diffraction, 143
Strain relieved buffer
Alternatives to thick MBE-grown relaxed SiGe buffers, 148
Strained Si
Formation of strained-silicon layer on thin relaxed-SiGe/SiO_2/Si structure using SIMOX technology, 199
Experimental evidence of valence band deformation due to strain in inverted hole channel of strained-Si pMOSFETs, 338
Limited number of carriers transferred to the strained-Si channel in the SiGe/Si/SiGe modulation-doped field-effect transistor, 362
Strained $Si_{1-y}C_y$/Si quantum well
Field-enhanced Stokes shifts in strained $Si_{1-y}C_y$/Si(001) quantum wells, 402
Strontium oxide
Heteroepitaxial growth of SrO on hydrogen-terminated Si(100) surface, 273
Structural relaxation
A study on the local bonding structures of oxidized Si(111) surfaces, 277
Sub-0.1 μn: MOSFET
A novel doping technology for ultra-shallow junction fabrication: boron diffusion from boron-adsorbed layer by rapid thermal annealing, 207
Sublimation molecular beam epitaxy
Properties of optically active Si:Er and $Si_{1-x}Ge_x$ layers grown by the sublimation MBE method, 426
Superlattice
Heteroepitaxial growth of SiGe films and heavy B doping by ion-beam sputtering, 171
Surface and interface
Strain near SiO_2–Si interface revealed by X-ray diffraction intensity enhancement, 281
Surface hydrogen
Gas-source MBE of SiC/Si using monomethylsilane, 269
Surface morphology
New kinetic growth instabilities in Si(001) homoepitaxy, 1
Surface phase separation
Dynamics of surface phase separation on patterned substrates by molecular beam epitaxy, 21
Surface phases
Nanostructures in silicon devices, 60
Surface reconstruction
SiC/Si heteroepitaxial growth, 257
Surface roughness
New kinetic growth instabilities in Si(001) homoepitaxy, 1
In situ characterization of thin $Si_{1-x}Ge_x$ films on Si(100) by spectroscopic ellipsometry, 157
Residual strain and surface roughness of $Si_{1-x}Ge_x$ alloy layers grown by molecular beam epitaxy on Si(001) substrate, 161
Surface segregation
Surface segregation and interdiffusion of Ge on Si(001) studied by medium-energy ion scattering, 112
A novel measurement method of segregating adlayers in MBE, 138
Surface species
Thermal decomposition pathway of Ge and Si oxides: observation of a distinct difference, 289
Surfactant
Ge thin film growth on Si(111) surface using hydrogen surfactant, 25
Growth of β-$FeSi_2$ and FeSi layers by reactive deposition using Sb-related intermetallic compounds, 248
Symmetrically strained Si/Ge superlattice
Experimental study of a surfactant-assisted SiGe graded layer and a symmetrically strained Si/Ge superlattice for thermoelectric applications, 121

Thermal conductivity
Experimental study of a surfactant-assisted SiGe graded layer and a symmetrically strained Si/Ge superlattice for thermoelectric applications, 121
Thermal decomposition
Infrared study of adsorption and thermal decomposition of Si_2H_6 on Si(100), 16
Thermal decomposition pathway
Thermal decomposition pathway of Ge and Si oxides: observation of a distinct difference, 289
Thermal desorption spectroscopy
Effect of Ge on the P doping in Si gas-source molecular beam epitaxy using Si_2H_6 and PH_3, 230
Thin film
Heteroepitaxial growth of SrO on hydrogen-terminated Si(100) surface, 273
Non-equilibrium molecular orbital calculations of Si/SiO_2 interfaces, 285
Threading dislocations
Relaxed $Si_{0.7}Ge_{0.3}$ buffer layers grown on patterned silicon substrates for SiGe n-channel HMOSFETs, 175
Ti cap
Epitaxial silicide interfaces in microelectronics, 233
$TiSi_2$
The effect of elevated silicon substrate temperature on $TiSi_2$ formatio from a Ti film, 244
Topography
Optical and structural characterization of Si/SiGe heterostructures grown by RTCVD, 431
Transformation
Thermal decomposition pathway of Ge and Si oxides: observation of a distinct difference, 289
Transient enhanced B diffusion

Comparison of SiGe and SiGe:C heterojunction bipolar transistors, 342
Transit time analysis
Comparative analysis of minority carrier transport in npn bipolar transistors with Si, $Si_{1-x}Ge_x$, and $Si_{1-y}C_y$ base layers, 347
Transmission electron microscopy
Relaxed $Si_{0.7}Ge_{0.3}$ buffer layers grown on patterned silicon substrates for SiGe n-channel HMOSFETs, 175
Initial stage of SiC film growth on Si(111)7×7 and Si(100)2×1 surfaces using C_{60} as a precursor studied by STM and HRTEM, 265
Structural and optical properties of $Si/Si_{1-x}Ge_x$ wires, 409
Optical and structural characterization of Si/SiGe heterostructures grown by RTCVD, 431
Tunneling devices
Nanostructures in silicon devices, 60
Tunneling diodes
Self-assembling SiGe and SiGeC nanostructures for light emitters and tunneling diodes, 33
Twin
RHEED analysis of twinned homoepitaxial layers grown on Si(111)$\sqrt{3}\times\sqrt{3}$-BQ, 5
Two-dimensional carriers
ESR investigations of modulation-doped Si/SiGe quantum wells, 312
Two dimensional electron gases
Si/SiGe n-type inverted modulation doping using ion implantation, 324
Two-dimensional effects
Hot carrier transport in modulation doped Si/SiGe and Ge/SiGe heterostructures, 333
Two dimensional electron systems
Schottky gating high mobility $Si/Si_{1-x}Ge_x$ 2D electron systems, 316
Two particle wave functions
Band ordering of the pseudomorphic $Si_{1-x}Ge_x/Si$ heterostructure: the fundamental role of excitons, 394
Two-step growth
Low-temperature growth of in situ phosphorus-doped silicon films: two-step growth utilizing amorphous silicon buffers, 185

Ultra high vacuum chemical vapor deposition
Alternatives to thick MBE-grown relaxed SiGe buffers, 148
A novel doping technology for ultra-shallow junction fabrication: boron diffusion from boron-adsorbed layer by rapid thermal annealing, 207
Experimental evidence of valence band deformation due to strain in inverted hole channel of strained-Si pMOSFETs, 338
$Si_{1-x}Ge_x$ selective epitaxial growth for ultra-high-speed self-aligned HBTs, 358
Strained $Si_{1-x}Ge_x$ graded channel PMOSFET grown by UHVCVD, 371

Ultra-shallow junction
A novel doping technology for ultra-shallow junction fabrication: boron diffusion from boron-adsorbed layer by rapid thermal annealing, 207
Ultrathin buried SiO_2
Capacitance–voltage study of single-crystalline Si dots on ultrathin buried SiO_2 formed by nanometer-scale local oxidation, 69

Valence band
Experimental evidence of valence band deformation due to strain in inverted hole channel of strained-Si pMOSFETs, 338
Vertical metal-oxide semiconductor device
Optimization of breakdown behaviour and short channel effects in MBE-grown vertical MOS-devices with local channel doping, 383
Vertical MOSFETs
Doped vs. undoped $Si_{1-x-y}Ge_xC_y$ layers in sub-100 nm vertical p-channel MOSFETs, 366
Vertical ordering
Formation process and ordering of self-assembled Ge islands, 104
Vertical tunneling device
A vertical MOS-gated Esaki tunneling transistor in silicon, 387
Vertically correlated islands
Strain-driven modification of the Ge/Si growth mode in stacked layers: a way to produce Ge islands having equal size in all layers, 43
Virtual substrate
Relaxed SiGe buffers with thicknesses below 0.1 μm, 152
A self-aligned epitaxially grown channel MOSFET device architecture for strained Si/SiGe systems, 375

Wavelength demultiplexer
Y-branch 1.3/1.55 μm wavelength demultiplexer based on the plasma dispersion effect, 419
Wetting layer
Formation of the wetting layer in Ge/Si(111) studied by STM and XAFS, 29
Wire
Step bunching and correlated SiGe nanostructures on Si(113), 39

X-ray diffraction
Residual strain and surface roughness of $Si_{1-x}Ge_x$ alloy layers grown by molecular beam epitaxy on Si(001) substrate, 161
Strain near SiO_2–Si interface revealed by X-ray diffraction intensity enhancement, 281
Structural and optical properties of $Si/Si_{1-x}Ge_x$ wires, 409
X-ray reflectivity
Optical and structural characterization of Si/SiGe heterostructures grown by RTCVD, 431
X-ray scattering
The formation of silicon (111) boron surface phases and their influence on the epitaxial growth of silicon and germanium, 10

Y-branch splitter
Y-branch 1.3/1.55 μm wavelength demultiplexer based on the plasma dispersion effect, 419
